

01 PROFILE

Odoo techno-functional consultant with 3.6 years across the full ERP lifecycle requirement analysis, solution design, custom development, deployment and support. Delivered 100+ module customizations across accounting, project management, website and POS, engineered eight production integrations spanning e-commerce, payments and support, and cut page load times by up to 30% through ORM and computed-field optimization. Works across Odoo 13-19 on Odoo.sh, Odoo Online and self-hosted AWS infrastructure.

02 EXPERIENCE

Odoo Techno-Functional Consultant Cybrosys Technologies

MAR 2023 PRESENT

Full-time Calicut, Kerala On-site | Leading Odoo ERP solutions provider

- Led 100+ Odoo module customizations and implementations across multiple business domains, converting complex business workflows into fully automated ERP solutions.
- Engineered eight production integrations across e-commerce, payments, delivery, loyalty and support, with the retry handling and duplicate protection that keep records consistent when the other side times out.
- Optimized ORM queries and refactored computed fields, reducing page load time by up to 30% tracing slow screens back to stacked non-stored computations and deciding what belonged in the database.
- Built project management workflows with custom tasks, stages, approvals and automated actions, and designed multi-company security rules, record rules and access control.
- Created custom PDF and Excel reports across Sales, Purchase, Accounting and HR, and developed fully responsive website pages and landing sections replicating client reference designs.
- Developed and published apps including Survey Management, Property Management, QuickBooks Connector, POS customizations, reporting modules and advanced themes.
- Managed Odoo.sh, Odoo Online and AWS deployments with containerized Odoo environments using Docker and Nginx, keeping custom modules portable across platform-specific constraints.
- Trained and mentored freshers on ORM concepts, module structure and coding standards; contributed to code review, task allocation and quality checks across active projects.

03 SELECTED PROJECTS

QuickBooks Connector. Two-way accounting sync chart of accounts mapping, contacts, invoices and payments over OAuth.

Property Management. Units, tenants, leases, rent scheduling, invoicing and maintenance as one Odoo vertical.

Survey Management. Structured question flows with respondent tracking, scoring and result analysis.

PDF & Excel Reporting Suite. QWeb PDFs that print correctly and Excel exports with real formatting, filters and totals.

Responsive Pages & Themes. Website pages and landing sections for consultation and real estate clients, matched to reference designs.

POS Customization. Custom screens, receipt layouts and counter-side workflow built on OWL to survive version upgrades.
